WORK EXPERIENCES

Irving Oil Limited

Saint John, NB

Software Developer (Co-op) | Salesforce, Lightning Web Components, Jest, SOQL, Git, Agile Scrum

May 2026 - Dec 2026

- Migrated the Hometown Rewards Salesforce Experience Cloud application from Aura to Lightning Web Runtime (LWR), reducing Largest Contentful Paint (LCP) from 6.08s to 1.05s (83% improvement).
- Designed and implemented 10+ reusable UI components with configurable inputs, including navigation and menu components that dynamically render site-specific options, improving component reusability and maintainability.
- Developed automated Jest unit tests for Lightning Web Components, expanding regression test coverage and reducing repetitive manual testing during feature validation.
- Collaborated in an Agile environment using Git and Azure DevOps, contributing to code reviews, pull requests, sprint planning, and iterative software delivery.

Irving Oil Limited

Saint John, NB

Software Developer (Co-op) | Apex, Salesforce Flows, Amazon Connect, Git, Agile Scrum

Sept 2025 – Dec 2025

- Developed Apex automation and Salesforce Flows to validate dealer rewards against a 2M+ record loyalty dataset, eliminating manual eligibility verification and improving data integrity.
- Engineered Amazon Connect telephony workflows and AWS Lambda integrations to automate call routing, callback handling, and after-hours routing during a Genesys-to-Salesforce migration.
- Designed and implemented a callback analytics workflow to measure callback completion times and identify bottlenecks affecting SLA performance.
- Built an Einstein bot using Apex and Salesforce Flows to automate customer feedback collection, case creation, and conversational workflows within Salesforce.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript, TypeScript, HTML, CSS, Apex, SQL

Frameworks & Tools: Salesforce, Jest, JUnit, Git, Azure DevOps, AWS Lambda, Amazon Connect, FastAPI, PostgreSQL

EDUCATION

Dalhousie University, Bachelor of Computer Science, GPA: 3.6 / 4.3

Sept 2022 - Sept 2027

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Computer Systems Programming, Database Systems

Member: Women in Technology Society (WiTS) Member & Mentor

PROJECTS

Dermacode | Python, FastAPI, TypeScript, PostgreSQL

April 2026 – Present

- Developing a full-stack skincare application using FastAPI, PostgreSQL, React, and TypeScript to analyze cosmetic ingredients and provide personalized product insights.
- Designing backend APIs and database architecture for product, ingredient, user profile, and analysis data.

AI Sales Coach | Python, FastAPI, GPT4All

Mar 2025 – July 2025

- Built a full-stack AI sales coaching application using FastAPI and a locally hosted GPT4All language model to generate sales feedback.
- Integrated an open source .gguf language model, enabling interface without reliance on external LLM APIs.

JSON Front-End Compiler | Python

Sept 2024 – Dec 2024

- Developed a recursive descent parser performing lexical, syntactic, and semantic analysis of JSON input.
- Implemented tokenization, abstract syntax tree (AST) generation, and semantic validation with informative compiler error reporting.
- Created 10 automated test cases covering valid inputs and semantic errors to validate compiler correctness.

LEADERSHIP

Dalhousie Women in Tech Society (WiTS)

Halifax, NS

Mentor

Sept 2026 – Present

- Selected as a mentor for the WiTS Mentorship Program, supporting and providing guidance to undergraduate students.
